Culebra Island embraces Caribbean Chic in newly remodeled Hotel Club Seabourne

Culebra, Puerto Rico – This is how one describes the new atmosphere and look of the paradise Hotel Club Seabourne on Culebra Island. With an investment of nearly half a million dollars, Club Seabourne celebrates 10 successful years on the island municipality. According to José Martí, president of the boutique hotel, we changed the color of our property to better address the new decade and this new phase. Our Deluxe Villas have been refurbished and the standards of our offerings have been upgraded to please the most demanding visitor. The use of white as the predominant color in a crystalline environment as refreshing as that of our island, allows our visitors to enjoy nature more. This color is accompanied by blue-gray tones, keeping our guests in a comfort and relaxation zone.

In the rooms, guests can enjoy the use of natural textures like wood flooring, stone tiles in the bathroom, and glass in many items, all framed by a predominantly white Caribbean villa with sand-colored elements. Several of our villas are decorated with a work of art by the photographer José Alberto Martí Ubiñas. Through his works, each room will feature a bit of Culebra in its interior. The rooms also feature new Natura brand personal care products, whose packaging is made from recycled materials, as well as robes for added guest comfort.

Other wonderful changes have been made to the main building area, where a new “Caribbean lounge” environment has been created for the restaurant, lobby bar, and the “Hanging Area” at the front of the bar. These new areas are perfect for visitors looking for a chic nightlife experience in a perfect natural environment. As part of this anniversary effort, the restaurant’s menu was redesigned to feature modern creative dishes; a new wine-by-the-glass program was launched with more than 10 varieties of wines and grapes that diners can taste. The entire wine experience can be had with Ridel glasses.

The hotel entrance and gardens have been remodeled, an area that has historically adorned the property. All lighting has been changed to yellow tones, thus creating a more intimate and chic environment.

In regards to its website, Club Seabourne launches its new image with an e-commerce application for tourists who wish to carry out the purchasing process from the comfort of their home or office. Some of the new Internet services include: convenient links to car rental and air transportation websites; Meet My Needs feature, in which the guest can choose in advance whatever he or she craves the most, and have it waiting for them in their room upon arrival and for each day of their stay, said Martí. In the next three months, we will continue with the second stage of the hotel remodeling, which will be announced shortly.”

Club Seabourne is located on Fulladoza Bay on Culebra Island. It is the only hotel endorsed by the Puerto Rico Tourism Company and the only boutique hotel. For more information, please visit www.clubseabourne.com or call 787-742-3169; email clubseabourne@gmail.com.
